

01 COMPANY INTRODUCTION

Sinton Group was established in Yancheng City, Jiangsu Province, China. Sinton Electric Co., Ltd., a sub-company of the Sinton group, initiated its business operations in 2001. A comprehensive group has been formed with energy-saving heating products at its core. Sinton is a national high-tech enterprise. The self-constructed factory covering an area of 40000 m² is located in Tinghu Environmental Protection Industrial Park. It is equipped with a production plant of 20,000 square meters and an R&D center of 3,600 square meters. The company focuses on technological innovation and brand creation, specializing in the manufacture of explosion-proof and non-explosion-proof immersion heaters, air duct heaters, pipeline heaters, oil / water circulation heaters, boiler heaters, electric drying machines, heat-conducting oil furnaces, electromagnetic coil heaters, and all types of electric heating elements, such as direct thermal energy providing elements or preheaters for projects. The products are primarily suitable for high-temperature heating environments ranging from 50 to 1000°C and are extensively utilized in various fields, including environmental protection, medical treatment, coal mining, petroleum, chemical industry, textile, plastics, heating, agriculture, animal husbandry, and others, thereby promoting the development of the Zero-Carbon Economy and the transformation of the green earth.

02 COMPANY QUALIFICATION

03 COMPANY PRODUCT

04 FIELD OF APPLICATION

Our products are widely used in various industries, including petroleum and chemical industry, oil and fat industry, synthetic fiber industry, textile printing and dyeing industry, feed industry, plastics and rubber industry, etc..

Oil circulation heater for reactor heating purpose

Oil circulation heater for perssing /modling machine

Oil circulation heater for chemical industry

Pipeline heater for electric power plant

Pipeline heater for oil industry

Room temperature rising of Activity Center

Pipeline heater for cement factory

Auxiliary heater
(Distillery auxiliary material fermentation)

For Sewage treatment\Disengaging
\Urea decomposition

Air duct heater for cotton drying

Air duct heater for room temperature rising

Explosion-proof heaters for
coal mine temperature rising

Explosion proof heaters for water tank

Electromagnetic heater for
Oilfield antifreeze

Electromagnetic heater for plastic industry

Gas Thermal Oil Heaters for room
temperature rising

COOPERATION ENTERPRISE CASES

安德烈茨 (中国) 有限公司

安徽南氟化工

中国兵器工业集团
